

Regio1st Planning Framework outline

Stage 7 Defining actions and developing the
regional energy plan

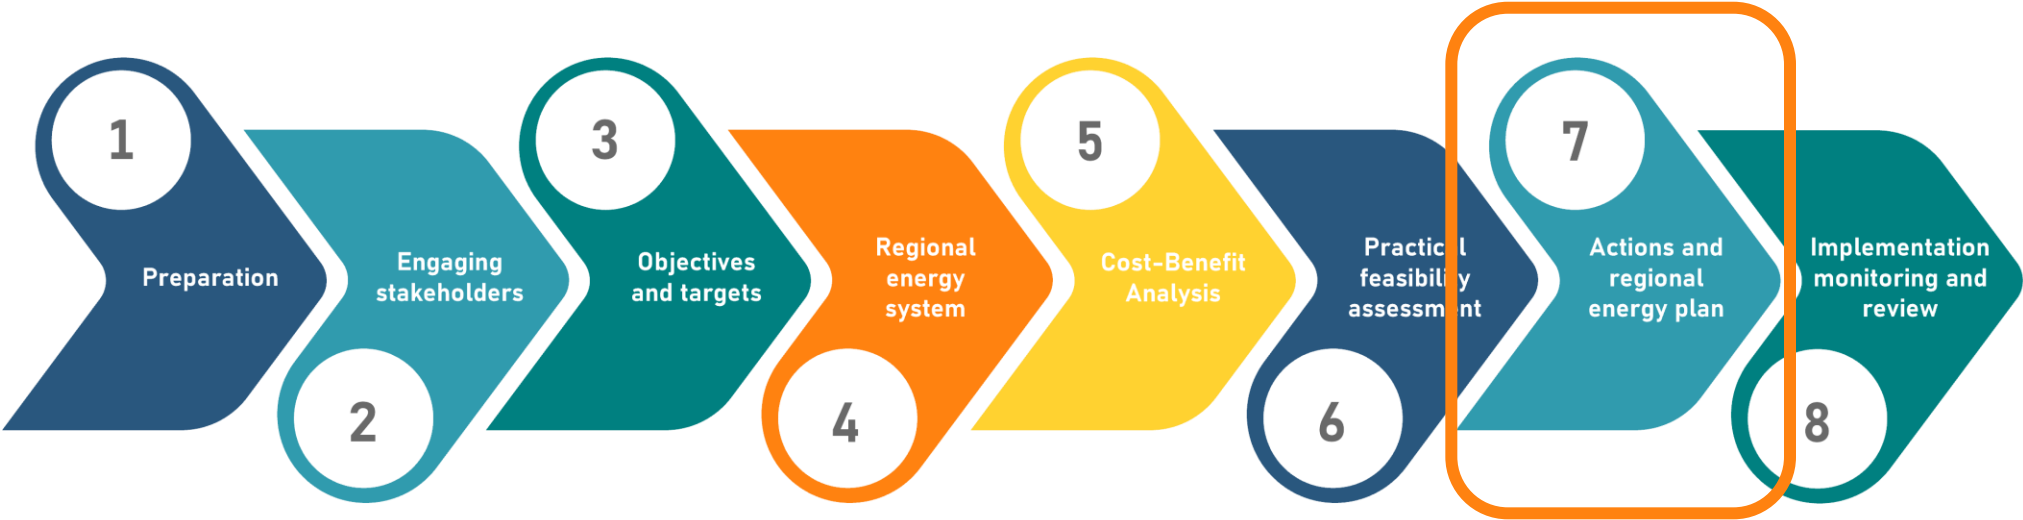

George Konstantopoulos

- ❑ Planning framework
- ❑ Stage 7 Defining actions and developing the regional energy plan
 - Step 7.1 Prioritise energy interventions and develop the regional plan
 - Step 7.2 Establish a monitoring and evaluation system
 - Step 7.3 Pursue public acceptance and finalise the regional energy plan

The Regio1st Planning Framework

Stage	Step	Tool
Stage 7 Defining actions and developing the regional energy plan	Step 7.1 Prioritise energy interventions and develop the regional plan	Multi-Criteria Decision Analysis (MCDA) Tool
	Step 7.2 Establish a monitoring and evaluation system	Monitoring Template
	Step 7.3 Pursue public acceptance and finalise the regional energy plan	

Stage 7 - Objective

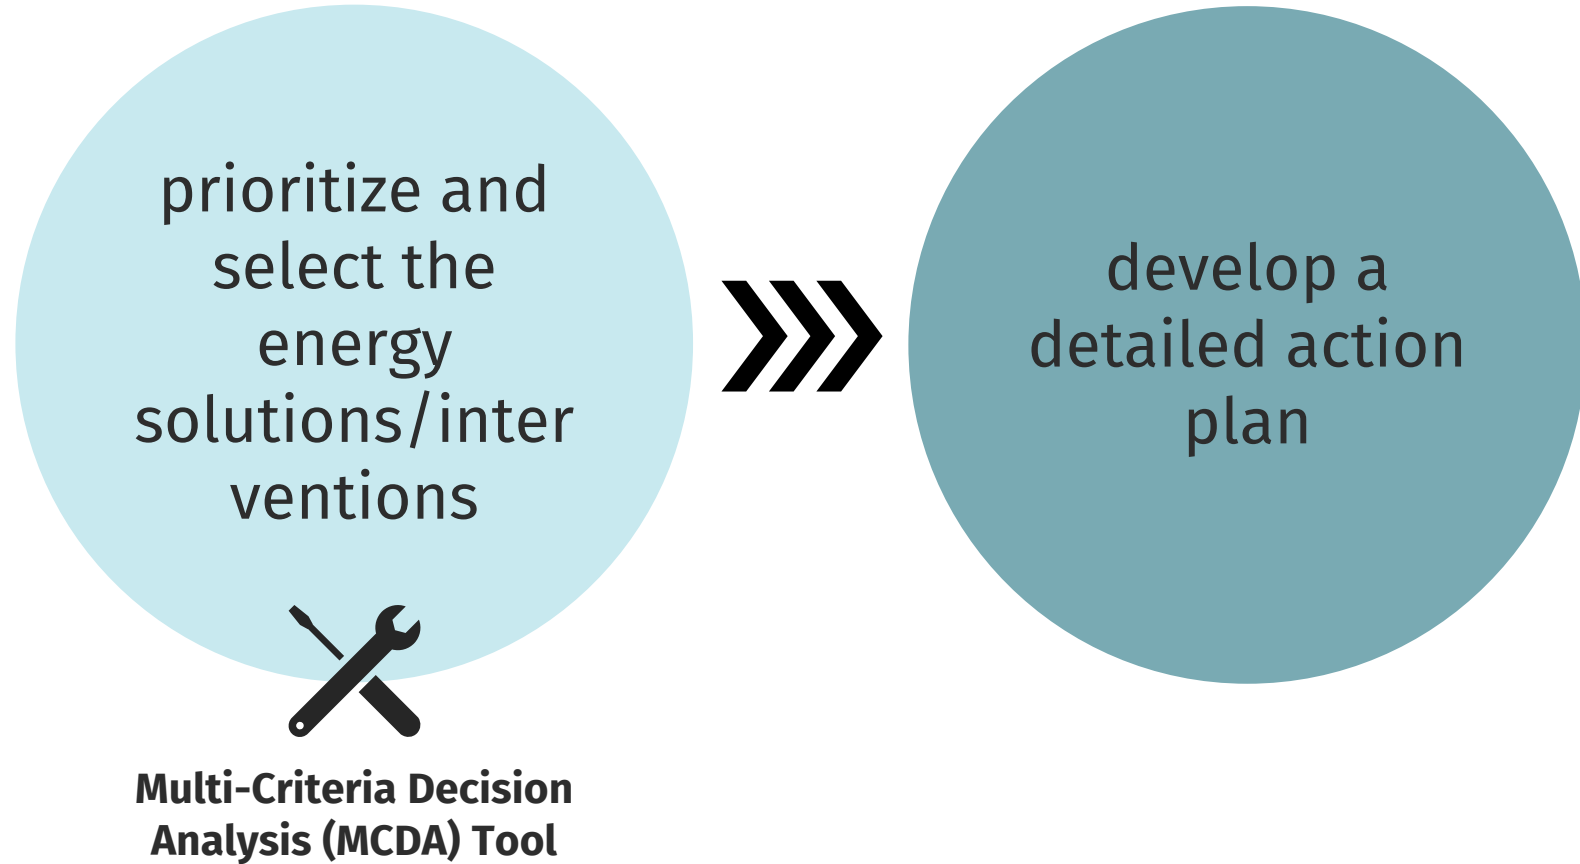

focuses on selecting specific **actions** and formulating a robust **regional energy plan**

- based on the potential impact, cost-effectiveness, net benefits, distributional impacts and
- alignment with stakeholder priorities of the optimal energy solutions.

Step 7.1 Prioritise energy interventions and develop the regional plan

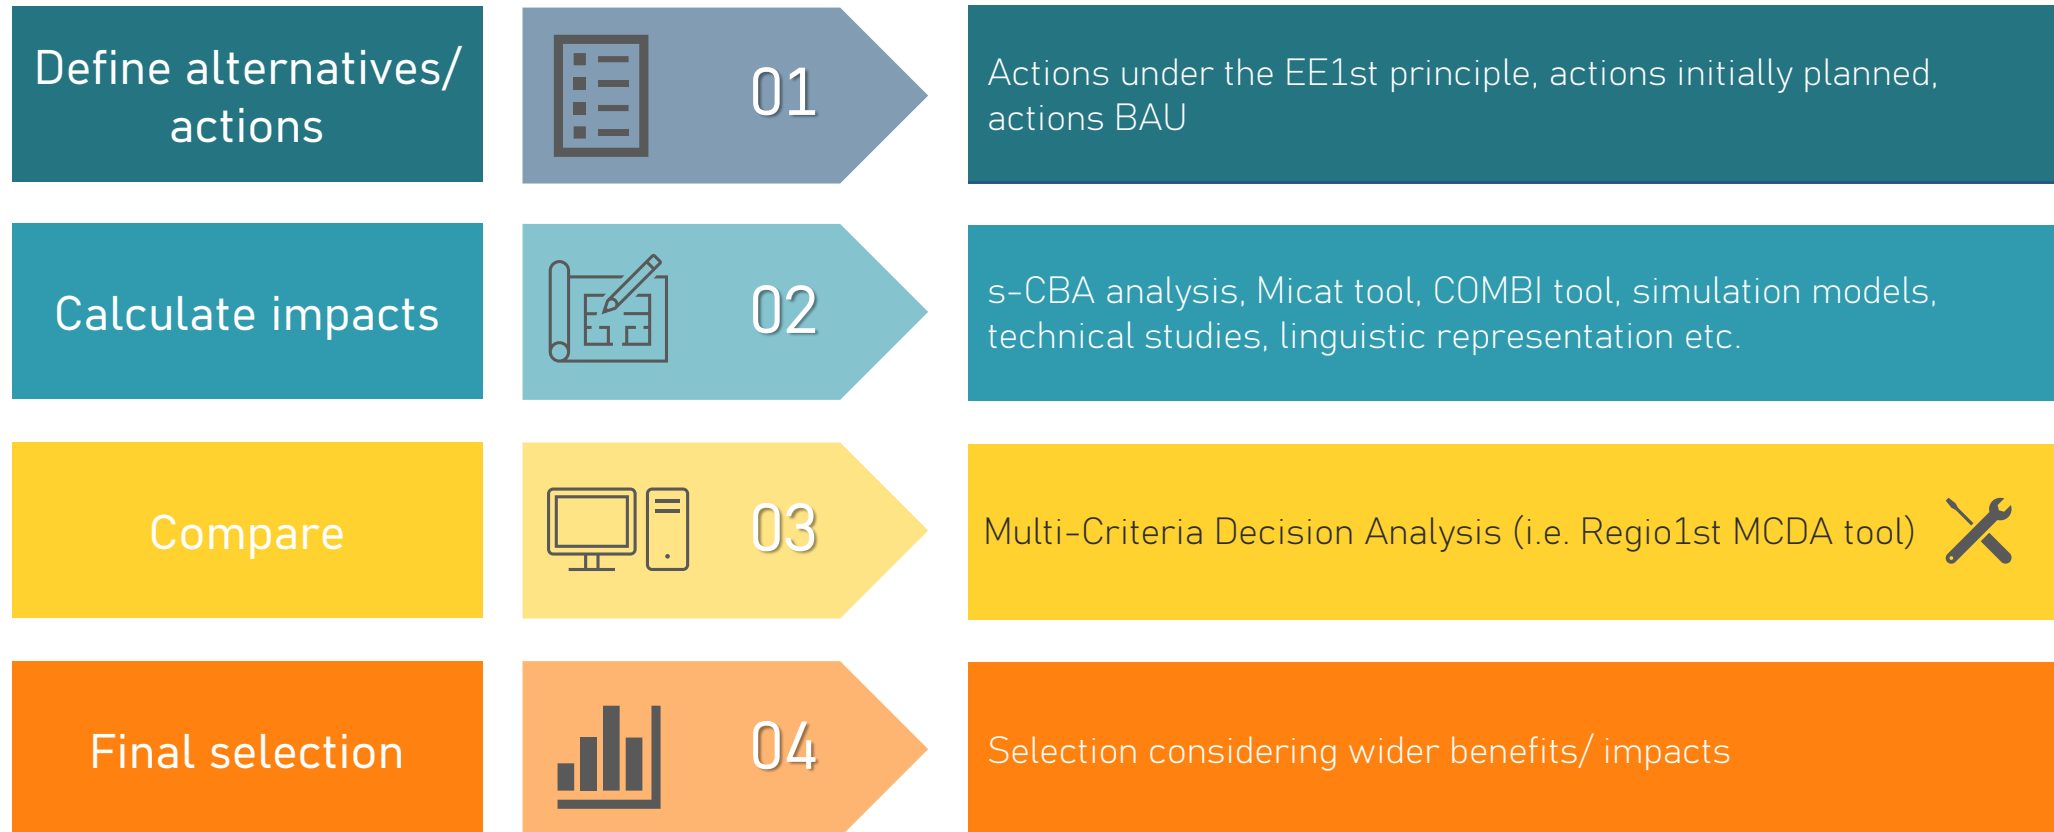

Planners need to

The prioritization process should be aligned with the energy efficiency first principle.

Step 7.1 Prioritise energy interventions and develop the regional plan

Prioritize and select the energy solutions/interventions

Step 7.1 Prioritise energy interventions and develop the regional plan

Develop a detailed action plan

- Timetable
- Personnel
- Resources
- Costs
- Funding
- ...

Demonstration projects

should also be identified, that address specific challenges or opportunities in the region to showcase the feasibility and benefits and provide valuable learning experiences to the local community.

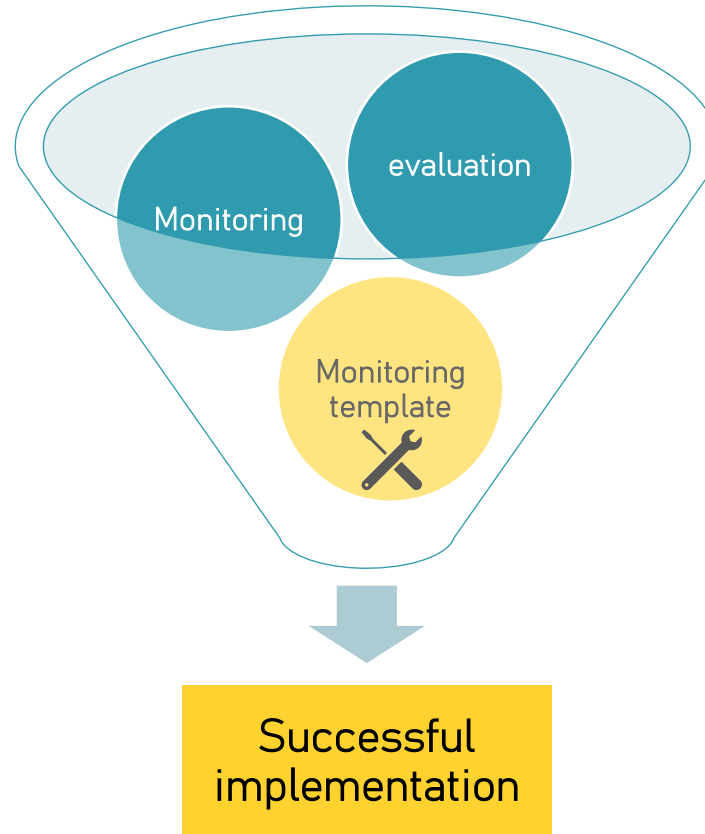

These can help build public support, attract investments and stimulate local markets for new energy solutions.

Step 7.2 Establish a monitoring and evaluation system

Planners establish

- robust monitoring and
- evaluation systems

to track progress in implementing the regional energy plan and assess its' performance against established objectives and targets.

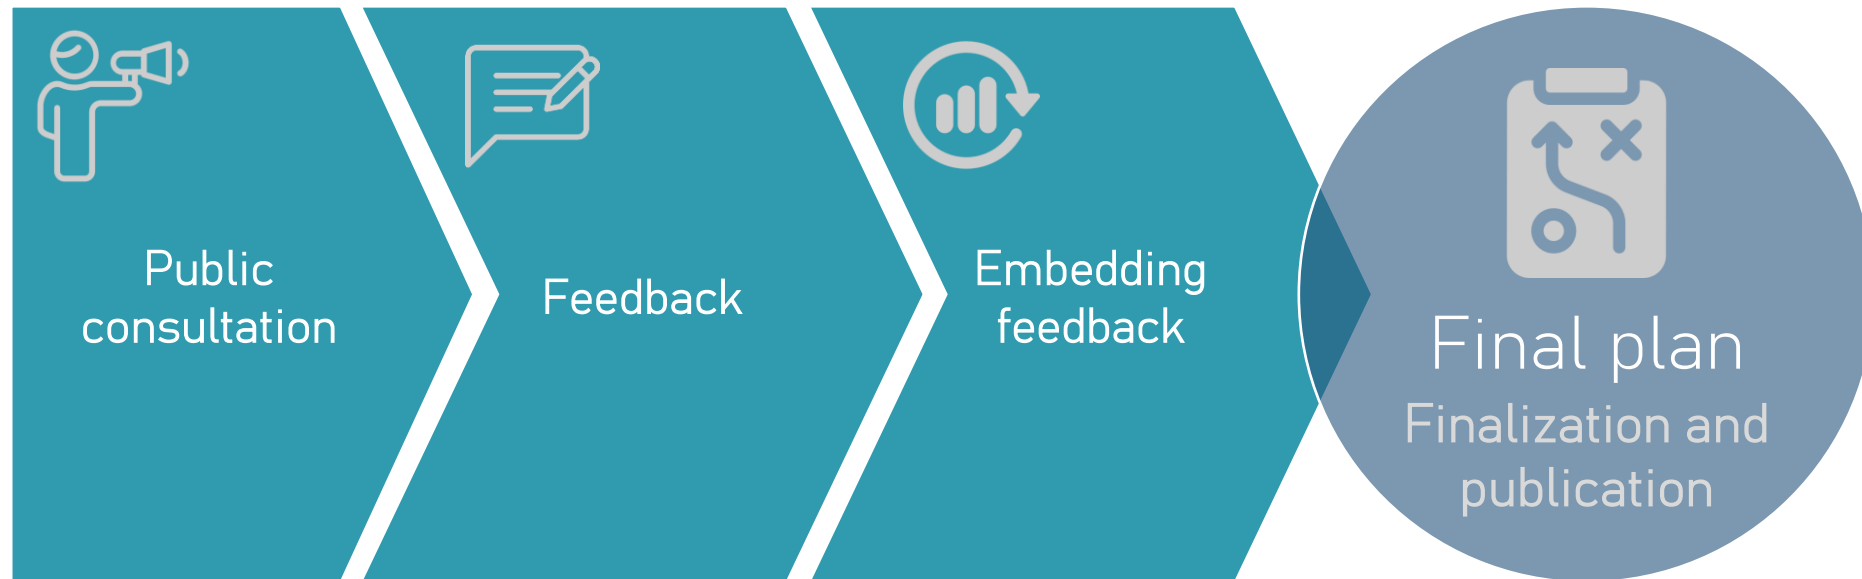

These systems should involve

- regular data collection,
- analysis, and
- reporting

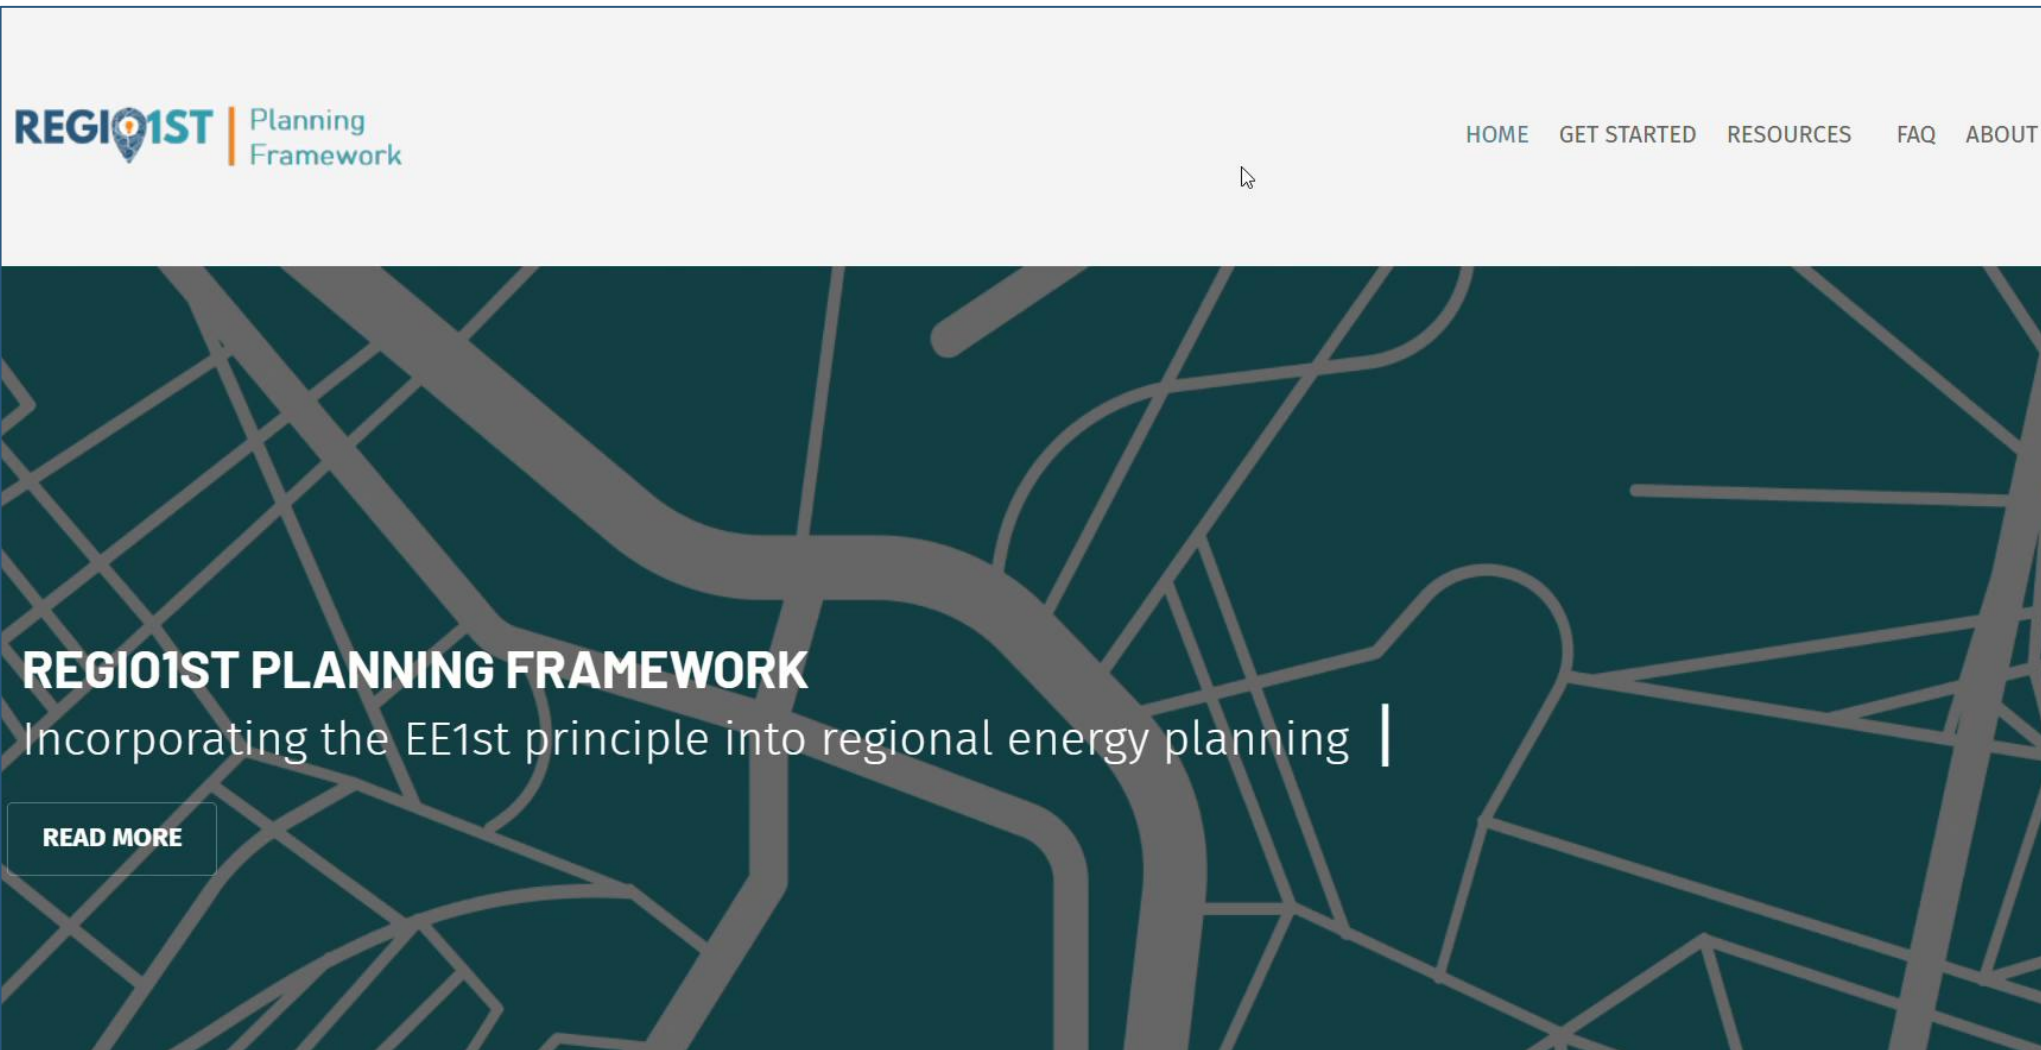

on key performance indicators

The monitoring and evaluation process should also involve **periodic reviews** and **assessments** of specific projects and actions to identify challenges, successes, and lessons learned.

Step 7.3 Pursue public acceptance and finalise the regional energy plan

Online planning framework

Thank you!
